

# Our Big Dream for Families

Build a new series of specialist rooms where children and their families can play, learn, and grow together.

## Our Big Dreams for Family Fund

**€500,000**

The **Big Dreams** campaign is seeking to raise €500,000 to rebuild and re-equip our buildings over the next three years. In Phase 1, we are looking to refurbish our Feeding Room and the schools' multi-sensory facilities to ensure that families can learn, play, and experience life to the full. When complete, these specialist facilities will help improve the lives of over 400 families every year.

### A new multi-sensory experience

For children with disabilities, multi-sensory stimulation is a vital tool in their education and development. Sadly, the multi-sensory equipment in both schools, is old and out of date. We urgently need to rebuild, refurbish, and re-equip all of our multi-sensory facilities so that every child can engage all their senses.

### A new home for our Feeding Room

There is nothing more important to a parent than being able to feed their child. But many children with disabilities have difficulty with the most natural abilities – feeding, eating, drinking, and swallowing. Ensuring that parents are able to meet their child's complex feeding needs is absolutely essential to their child's development. But for many parents, the process of learning how to feed their child is a long, difficult, and extremely emotional journey. Right now, the room in which parents learn is in urgent need of refurbishment. Our dream is to build a new Feeding Room where parents can learn to feed their child in a comfortable and homely setting.

**Join us!**

### Phase One

**€20,000** Reconstruction of each of our school Multi-Sensory Rooms.

**€35,000** Specialised Multi Sensory Equipment including protective padding for walls and floor, and a gantry hoist.

**€50,000** Redecoration of new Feeding Room.

**€75,000** Reconstruction of existing Feeding Room.

**The difference  
your gift will  
make is  
incredible**

“For many people, feeding their child is the first and most important parenting skill. Coming to terms with the difficulties their child is having can be very daunting. At the moment, our Feeding Room is a very artificial scenario. Unfortunately, we can't go to everyone's home, so it is really important that we can offer parents a safe and familiar environment – and one that mirrors the home. The difference that will make for parents is incredible.”

**Jenny Neary, Speech and Language specialist.**

“ Our **Big Dream** for Joshua and Olivia is that they develop their communication skills and thrive in an education environment that is inclusive and nurturing.”

**Laura, Joshua and Olivia's mum**

**BIG  
Dreams**

Inspiring a brighter future  
for children and adults with disabilities

## Are you a Big Dreamer?

Every gift you give will help us redevelop our core family facilities. **But if you make an inspirational donation of €180,000** or more, you could enable the completion of all of Phase 1 of our refurbishment plan, ensuring that no family has to wait any longer to access the standard of facilities they deserve. You may not meet all the families who pass through these rooms – but we will never forget you and your incredible gift, offered when we need it most. Just contact our **Big Dreams** team today... and help make this dream come true.
